# The Hydr8 Shower Collection

The Hydr8 collection sets new standards for shower enclosures. Outstanding aesthetic appeal across an extensive range of design options - to suit every style and size of contemporary home - is matched by a commitment to high quality production and innovative features. Enhanced by superb materials throughout, and state-of-the-art engineering, the Hydr8 range offers you the ultimate in choice for the chic modern bath or shower room.

Crisp, clean and chunky designs, with minimal clutter and hidden fixtures, create a light and spacious look which is easy on the eye and offers an exquisite showering experience.

## Twyford - a name you can trust

For over 150 years, Twyford has led the way in bathroom technology - and we bring all our experience and expertise to the Hydr8 shower enclosure collection. Our reputation for excellence and performance has made us a household name, a brand which is recognised worldwide - and which you can rely upon for complete customer satisfaction. Hydr8 offers you superb quality and contemporary design at remarkably affordable prices. Just what you've come to expect from Twyford.

## High production values

We work to the most demanding specifications at every stage, from initial design through to the final product and its packaging, to ensure that every customer is completely satisfied with the performance of the product as well as its looks. And with clever design features, we have made installation easier too - with a perfect fit in even the most difficult of applications, and a range of shapes and sizes to suit every situation.

## Fine quality

Twyford is part of the Sanitec Group, who have been designing and developing superb shower enclosures for many, many years. We work to the highest standards to ensure complete design and performance integrity, with fine quality products that are built to last and retain their good looks. All of our products are manufactured to strict quality standards, and comply with ISO 9002. The glass used for all enclosures and screens is 8mm safety glass conforming to BS6206, Class A.

## Lifetime guarantee

Every product in our Hydr8 collection has been designed and manufactured to the highest of standards. We are so confident in their quality, reliability and performance that we offer you a Lifetime guarantee with all of our shower enclosures and trays.

**LIFETIME**  
guarantee

Bow Quadrant

Shapely, sophisticated and spacious, the cool curves of the corner-fitting Bow Quadrant feature a single sliding door.

Roll it back smoothly so you - or even two - can step inside for a roomy, relaxing shower.

Available in two sizes, each with its own dedicated shower tray.

Simply sensational!

Bow Quadrant

D Shape Bow

Designer-style showering, with a uniquely attractive D Shape profile enclosure that's chic and contemporary yet classically appealing.

Smooth running double sliding doors open up a whole new concept in showering pleasure. Our D Shape enclosure comes complete with its own dedicated tray.

D Shape Bow

Slide back the door... for flexible, versatile use of space.

Available in a choice of six sizes, Hydr8 Sliding Doors can close off a recess, or, with a side panel, make the most of a corner.

Showering in comfort for one... or maybe two.

Hydr8  
Life in  
your shower

Luxuriously proportioned in a choice of three sizes, the Quadrant range of enclosures provides you with the perfect balance of form and function.

The beautifully curved glass sliding doors optimizes your use of bathroom space... and our Offset design, in five larger sizes gives you the luxury of even more room for relaxed and comfortable showering.

Quadrant

Offset Quadrant

Hinge Door

Simple... yet sophisticated. Full-opening frameless Hinge Doors - in four sizes - can be used to create your perfect shower space in a recess, or combined with a side panel to form the perfect solution for a bathroom corner.

Walk In Curve

Shapely and stylish, a fashionable frameless Walk In Curve Panel will harmonise with your bathroom suite to create a beautiful showering space - either on its own or in conjunction with a Walk In Side Panel. Our Walk In Curve enclosure comes complete with its very own dedicated tray.

Walk In Curve

A close-up photograph of a man in a shower. He is shirtless, with his eyes closed and a slight smile, enjoying the water. His hands are on his head, and water is spraying all over him. The background is a light-colored tiled wall.

Hydr8  
Life in  
your shower

Walk In Flat

## Walk In Flat

Opt for a light and spacious, minimalist look with a simple, single panel set at 90° to your bathroom wall - or combine a Walk In Flat Panel with a Walk In Side Panel to make your shower space more intimate.

Walk Through

Walk Through

Step into your 'wet room' style shower from either side... with a sophisticated, contemporary Walk Through Panel, in a choice of three sizes.

Adjustable stabilizing bars enable you to perfectly utilise the space available.

## Sail Screen

## Radius Screen

Create an aesthetically appealing bath and shower combination with a simple but shapely Bath Screen, in Sail or Radius design. Swinging out smoothly to 90° from a hinged wall post, and crafted in clear high quality glass. There is the added option on both screens to have either a black or clear seal - black creating a more dynamic and bold feel.

Shower trays and waste

90mm High Flow Waste

Suitable for all our trays, and enabling water to flow away at over 32 litres a minute. An offset elbow assists installation, and there's a quick release inner unit for easy cleaning. Available in chrome finish.

All of our bespoke trays are designed to complement their specific enclosure, and are produced in high quality, high performance ABS stone resin. Strength and rigidity are enhanced by a tough acrylic capped ABS outer shell, filled with stone resin mix. This means there is no unwanted movement. The surface is impact and chemical resistant, and it's heat-retaining qualities give it a comfortably warm feel to the feet. These trays are all manufactured to BS6340/5 and can be installed as floor standing, or on a plinth.

Bow Quadrant

Exclusively designed for our curvy and chic Bow Quadrant enclosures, this durable and attractive tray comes in two sizes, 780mm and 880mm. It can be installed straight onto a wooden floor or built up - whichever suits your specific needs. Can be used with the 90mm fast flow top-access waste unit.

D Shape

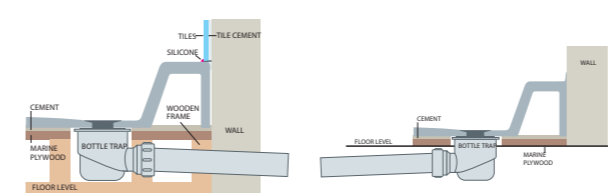

The designer style of our unique D Shape profile shower enclosure is complemented and completed with its own bespoke shower tray. As with all our trays, it can be installed straight onto a wooden floor, or build it up as required - it's easy to fit, and can incorporate our 90mm fast flow top-access waste unit. One size only.

Walk In

Sized 1400mm x 900mm, this dedicated shower tray has been designed for exclusive use with our Walk In Curve Panel, perfectly matching it's radius. It can also be used with a Walk In Side Panel fitted along the opposite edge. As with all Hydr8 bespoke shower trays it can be installed straight onto a wooden floor or built up. Compatible with the 90mm fast flow top-access waste unit.

Applications

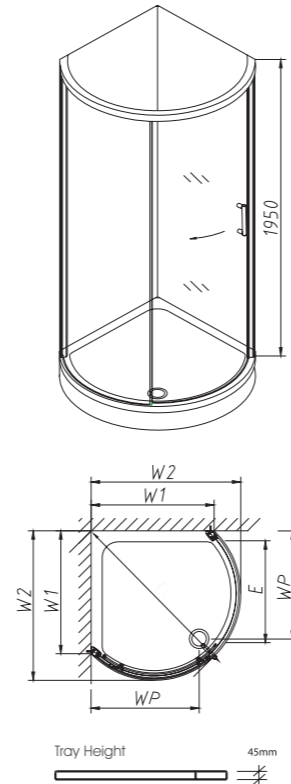

Installation is made simple and accurate with a flexible range of options to suit the application and environment. Hydr8 shower trays can be installed straight onto a wooden floor, or built up on a plinth where required. This alleviates the problem of uneven surfaces, so the shower tray is level and water flows off efficiently. All fittings are concealed by the shower tray design.

Bow Quadrant

Line Drawings

- This product consists of a curved fixed panel & a curved sliding door panel, and features the following:**
- 8mm glass, conforming to all relevant safety standards (BS6206A) to give you complete peace of mind
  - Height of 1950mm - that little bit extra to catch all those splashes
  - Polished silver profiles, for a contemporary look which matches most accessories
  - Tolerance for out of true walls, with up to 50mm adjustment (25mm each side)
  - Aluminium profile concealing all fixings inside the product - which aids hygiene as well as appearance

- Door swings back, making cleaning easy - even in those hard to reach places
- Micro adjustment system enabling very small adjustments, one at a time - very useful when installing
- Black cover caps on the top of all profiles, producing a stylish and practical finish
- Black or clear seal options - although black makes a design statement, it does not suit every bathroom
- Universal handing: this enclosure can be fitted to open from either the left or right hand side
- Concealed magnetic door closure - leaving the enclosure with a clean finish to prevent hard water tarnish

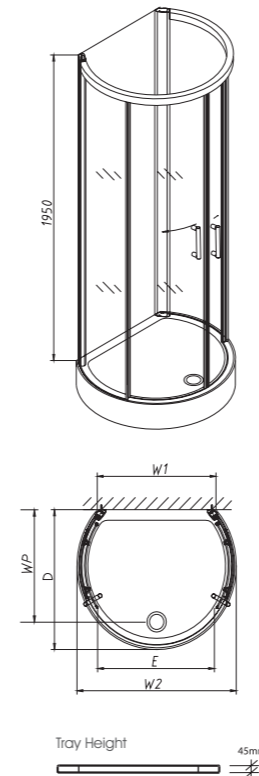

- Note that both Hydr8 Bow Quadrant enclosures come in two packages
- Dedicated Tray Details:**
- Manufactured from acrylic capped stone resin - for a smooth finish that is built to last
  - 90mm fast flow top-access waste (to be ordered separately)
  - Can be installed straight onto a wooden floor or built-up, please refer to page 45 for details
  - Note that these trays are suitable for the Twyford Bow Quadrant enclosures ONLY

Walk Through

Line Drawings

This product consists of a frameless glass panel with two telescopic stabilising bars, and features the following:

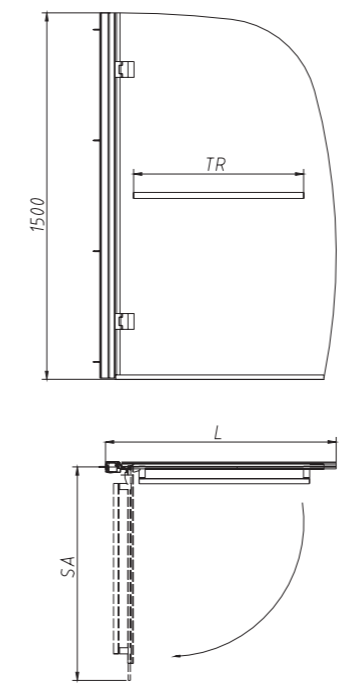

- 8mm glass, conforming to all relevant safety standards (BS6206A) to give you complete peace of mind
- Height of 1950mm - that little bit extra to catch all those splashes
- Polished silver stabilising bars, for a contemporary look which matches most accessories
- Telescopic stabilising bars that allow the distance from the wall to be varied
- Variable sized towel rails for maximum utilisation
- All Hydr8 Walk In products feature an aluminium bottom profile which allows them to be fitted straight onto the floor in a wet room situation, or on top of a tray

Line Drawings

This product consists of a wall post, two hinges, and a frameless glass panel. It features the following:

- 8mm glass, conforming to all relevant safety standards (BS6206A) to give you complete peace of mind
- Height of 1500mm - that little bit extra to catch all those splashes
- Polished silver profiles, for a contemporary look which matches most accessories
- Tolerance for out of true walls, 25mm each side
- Hinge outwards 90 degrees from wall post
- Aluminium profile concealing all fixings inside the product - which aids hygiene as well as appearance
- Micro adjustment system enabling very small adjustments, one at a time - very useful when installing
- Black cover caps on the top of all profiles, producing a stylish and practical finish
- Black or clear seal options - although black makes a design statement, it does not suit every bathroom
- Note this product features a towel rail as standard
- Hand denoted by position of wall post (left hand shown above)

...a little more detail about the phrases we use to describe our products

**Bow Quadrant**

Based on a standard Quadrant with an extra 'bow' shaped section to provide more space. The enclosure has a fixed curved panel with a sliding door.

**Concealed Magnetic Door Closure**

The magnet is hidden behind the profile of the enclosure and thus not visible.

**D Shape Bow**

This enclosure is in the shape of a capital D, with the flat section sitting against the wall. It is made up of fixed panels with double sliding doors.

**Hinge Door**

This door is on hinges which open away from the door post to enable the door to open fully.

**Micro Adjustment System**

A means of ensuring the framework is vertical/square by being able to adjust in small increments.

**Out of True Walls**

These are wall surfaces which are not completely level or even. Our installation system enables you to compensate for this problem.

**Profile**

The aluminium framework of the enclosure.

**Quadrant & Offset Quadrant**

The Quadrant enclosure has a quarter shape, with the right angle fitting into a corner. The Offset Quadrant has one straight edge longer than the other to create more showering space.

**Radius Screen**

A screen panel with a curved top edge.

**Sail Screen**

As the name suggests, this screen has a curved side edge resembling a sail.

**Shower Tray**

The floor section of a shower enclosure, with a built-in waste for the water to flow away.

**Side Panel**

Used with a Hinge or Sliding Door to create a two-sided shower enclosure.

**Sliding Door**

A product which simply comprises of one fixed panel with a sliding door panel moving behind it to open.

**Walk In Curve**

A curved glass panel which is fitted to a wall to create a showering space.

**Walk In Flat**

A flat glass panel attached to one wall - you simply walk in behind it to the showering space.

**Walk Through Panel**

A freestanding glass panel which creates a showering space accessed from either side.

**Waste Unit**

The fitting which enables the water to flow out of the shower tray. The 'elbow' is the angled water pipe section.

**Wet Room**

A completely tiled showering space with no shower tray - the waste pipe is fitted straight into the floor.

## Looking after your Hydr8 shower

Hydr8 shower enclosures and trays are designed to provide you with a luxurious showering experience. You can help to maintain their good looks and performance by getting into a routine of regular cleaning - it only takes a few moments after each shower to ensure that your enjoyment of our products lasts a lifetime.

## Enclosures

Shower enclosures should be cleaned after every use. To prevent limescale from building up, use a squeegee, a soft cloth or chamois leather - but no cleaning agent - to wipe off any water droplets left after showering. Residue left by bodycare products (liquid soap, shampoo, shower gel) can also cause substances to accumulate. Use water to rinse away residues after use. All sliding door track fittings should also be cleaned this way - to ensure that they continue to run smoothly.

## Trays

Maintaining the clean and attractive looks of your shower tray is easy. Clean with warm soapy water or mild detergent after each use, and wipe dry with a clean cloth. Gritty or abrasive cleaners should never be used, as they may mark the surface. Should limescale or fine scratches become a problem, apply T cut with a damp cloth and then polish it off. The waste trap is designed for easy access and should be removed and cleaned regularly - every week if the shower is in daily use - ensuring that any debris is removed.

## Handy hints for cleaning Hydr8 products

- Don't allow limescale to build up - especially in hard water areas
- If you do get a stubborn limescale build up, a mixture of 50:50 vinegar and water will help you to clean it away - but make sure all vinegar is rinsed off completely
- Never use strong detergents or cleaning agents
- Cleaning materials should wherever possible be rated between PH4 and PH8
- In no circumstances should you use any abrasive substances

**Take good care of your shower enclosure... and you'll enjoy the benefits for a lifetime**
